

Pennine Lancashire Palliative and End of Life Care Model

Pennine Lancashire
**Palliative and
End of Life Care**

Overarching Principles

Supporting the people in Pennine Lancashire to live well before dying with peace and dignity in the place of their choice

End of Life Care

“End of Life Care is care that helps all those with advanced, progressive, incurable illness to live as well as possible until they die. It enables the supportive and palliative care needs of both patients and family to be identified and met throughout the last phases of life and into bereavement. It includes management of pain and other symptoms and provision of psychological, social, spiritual and practical support.”

National Council for Palliative Care (NCPC)

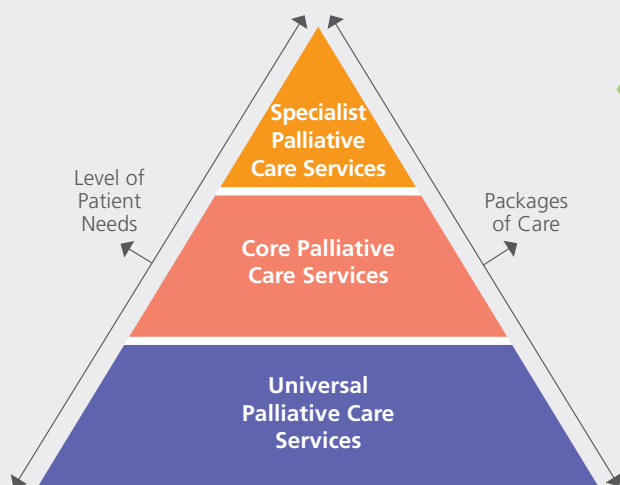

It should include:

- A person centered approach to care – including the person and those closest to them in all aspect of their care including the decision making process around treatment and care as they want
- Open, honest and sensitive communication with patient and those important to them
- Care which is coordinated and delivered with kindness and compassion
- All discussions and decisions to follow the principals of the Mental Capacity Act (MCA 2005)
